

DIESEL-FIRED HOT WATERJET CLEANER

Our Diesel-fired Hot Water-jet Cleaner is purpose-built to tackle heavy contamination with the power of high-temperature water and steam. Designed for ease of operation, this advanced cleaning system allows for efficient and effective cleaning while minimizing the need for extensive manual effort. With its robust capabilities, this cleaner is ideal for handling challenging cleaning tasks that involve heavy levels of dust and grime, providing exceptional results with minimal human exertion.

Diesel Fired Hot Waterjet Cleaning Machine

This machine consists of :

- High Pressure hose 10 mtr with QRC
- Fuel Capacity 24 Ltr
- Glycerin filled Pressure Gauge
- Control Panel – 24 V
- High Pressure steel Nozzles (Fan & Pencil)
- Warning Indicator Light
- Temperature Switch
- High efficiency SS Vertical Boiler

BASIC FEATURES OF THE MACHINE :

- Entirely made of stainless steel.
- Electric motor with thermal protector
- Triplex pump with ceramic plungers connecting rod system
- Pressure regulator with built in detergent suction.
- Fuel, water and detergent filters
- Pressure gauge and thermostat
- All safety aspects have been considered in the machine
- This Nozzles designed accordingly to the customer cleaning Requirements
- This is an energy efficient machine Optimum energy only utilized for cleaning.
- Easy accessible for Operation and Maintenance

ADVANTAGES :

- It Saves Energy, Water, and Time & Human Efforts for doing the Cleaning.
- This machine gives Consistency in cleaning Process.
- This machine required only one man power to operate.
- Less manpower fatigues
- Rinsing Process
