

# HIGH-PRESSURE COLD WATER JET CLEANER

The High Pressure Cold Water jet Cleaner is specifically designed to clean for the various application in various industry by using high Pressure water to clean difficult cleaning Task such as heavy dirt's, grimes, contamination from the machinery surfaces, etc by environmentally friendly process and Cost effective solution.

## High-Pressure Cold Water Jet Cleaning Machine

### This machine consists of :

- High Pressure Pump
- Electric Motor and its Control panel
- Easy Moveable SS 304 / MS Trolley
- High Pressure with Trigger gun
- Special Type of Nozzles for various type of Cleaning Requirement.
- Pressure Regulating & Safety Valve Devices.

### BASIC FEATURES OF THE MACHINE :

- Specialized Heavy Duty Industrial Model
- Complete Trolley Frame and Cover is SS 304 / MS.
- Special Seal for Ceramic type Plunger which Increase the life of the Pump
- Easy accessible for Operation and Maintenance
- Good aesthetics appearance
- Manufacture as per cGMP Norms and Audit Requirements
- All safety aspects have been considered in the machine
- This machine is also available in both FLP & NON FLP version.
- This Nozzles designed accordingly to the customer cleaning Requirements
- This is an energy efficient machine Optimum energy only utilized for cleaning

### ADVANTAGES :

- It Saves Energy, Water, and Time & Human Efforts for doing the Cleaning.
- This machine gives Consistency in cleaning Process.
- This machine is already passed by FDA audits.
- This machine required only one man power to operate.
- Less manpower fatigues
